1. The Service Problem

a) A short description of the service problem and its significance

Dam Sen, a well-known amusement park in Vietnam, established in 1976 and officially opened in 1989, offering diverse services including amusement rides, dining, and entertainment activities (Appendix A).

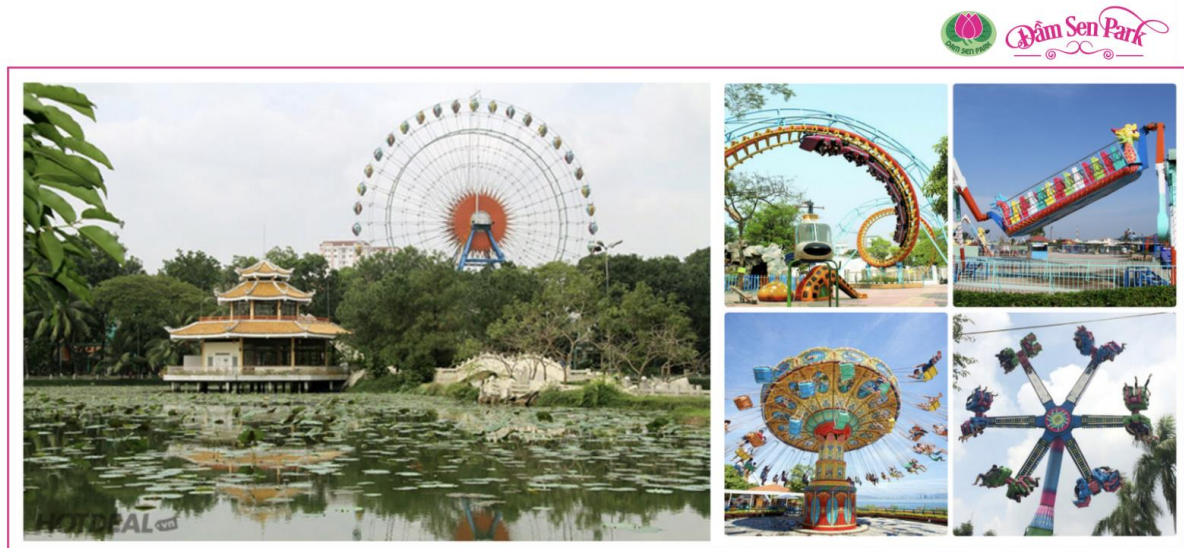

Figure 1. Dam Sen Cultural Park

However, it is currently facing serious problems with customer support services, especially the delay and unprofessionalism of on-site and call center staff (Appendix B). Meanwhile, in service delivery, untimely responses cause stress (Bolton et al. 2018) and reduce customer satisfaction (Goes et al. 2018). In terms of business, negative reviews can reduce reputation and competitive position in the entertainment industry (Banerjee et al. 2017).

b) Analysis of problem using service marketing theory

Service Blueprint

The Service Blueprint (Lynn Shostack 1982) visualizes the customer journey and highlights key pain points and failures. At Dam Sen, two main concepts emerge.

- **Pain Point (P):** This occurs when customers seek help from staff or the hotline. The critical Moment of Truth (MoT) is the expectation of timely support, but instead, customers often face delays, unhelpful answers, or no assistance, causing confusion, stress, and disappointment.
- **Fail Point (F):** The root cause of the P is a system failure - a poorly operated hotline, untrained staff, and weak internal coordination. This F disrupts the service flow, pushing customers to solve problems themselves, which damages their overall experience at Dam Sen.

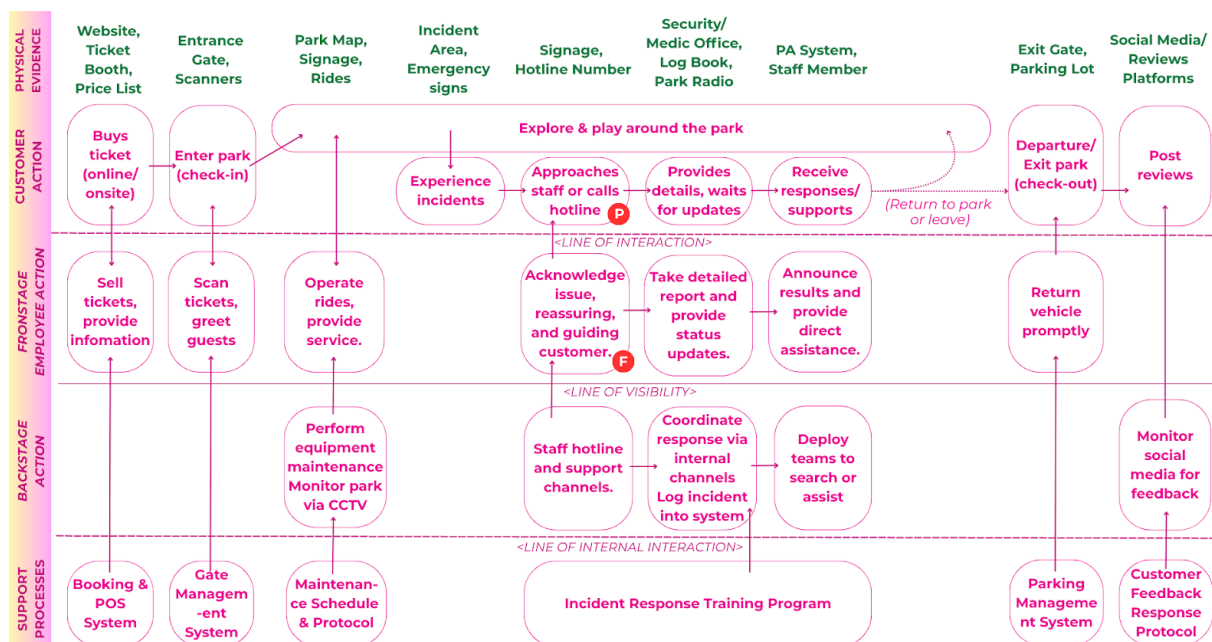

Figure 2. Service Blueprint

Servicescape

According to Hanks and Line (2018), servicescape refers to the physical environment where customers engage with services. At Dam Sen, three key Moments of Truth (MoTs) shape the visitor experience:

- MoT₁ – Physical environment: Unclear signage and poorly marked support points contribute to confusion and discomfort.
- MoT₂ – Staff interaction: Delays and untrained staff reduce trust and perceived service reliability.
- MoT₃ – Hotline & internal support: Poor coordination between departments leads to unresolved issues in emergencies, increasing frustration.

These are critical service touchpoints, failure in one can disrupt the entire customer journey, regardless of how well others perform.

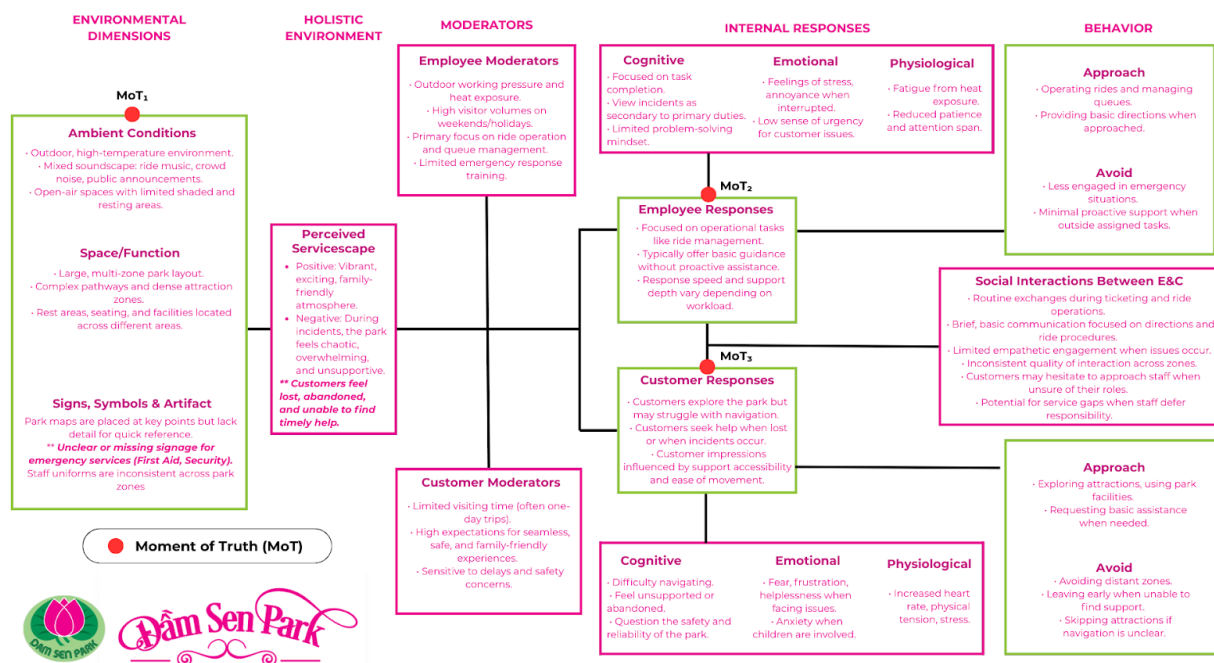

Figure 3. Servicescape

SERVQUAL

Based on the SERVQUAL model by Buttle (1996), several issues reflected failures across all five dimensions at Dam Sen. Customers reported the unresponsive support hotline (lack of responsiveness) and the indifferent staff (lack of empathy), leading to a decrease in service reliability. Moreover, the lack of skills of the staff made customers feel insecure (lack of assurance), while the instructions, communication channels, and support desk were all ineffective (lack of tangibles), causing serious disruption to the customer experience.

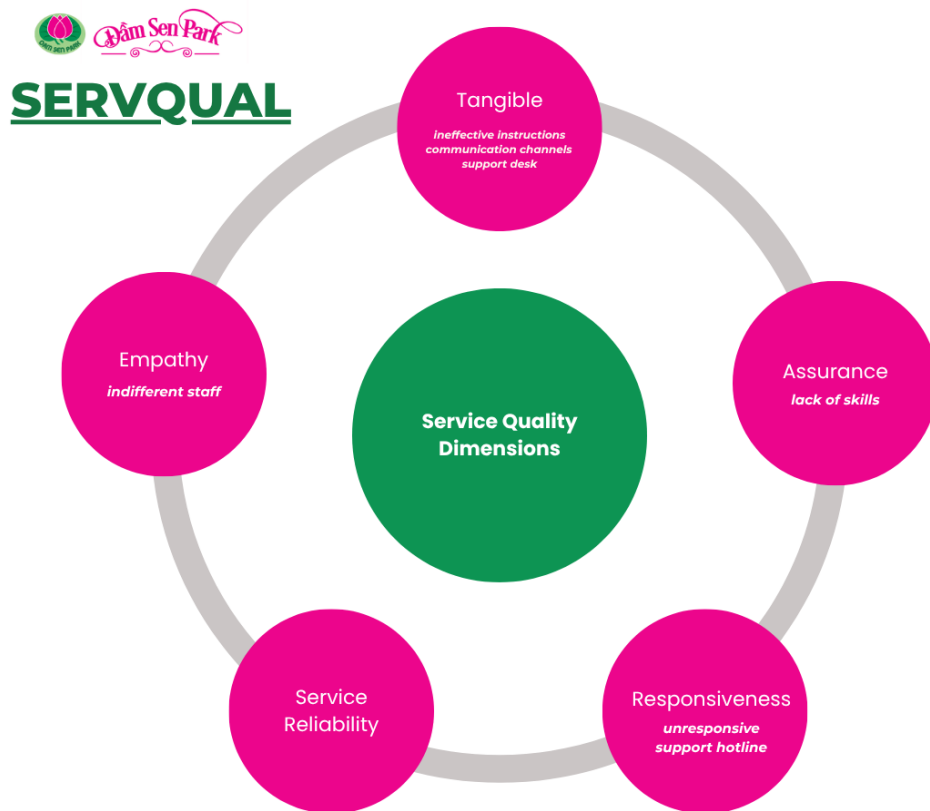

Figure 4. SERVQUAL

Fishbone Diagram

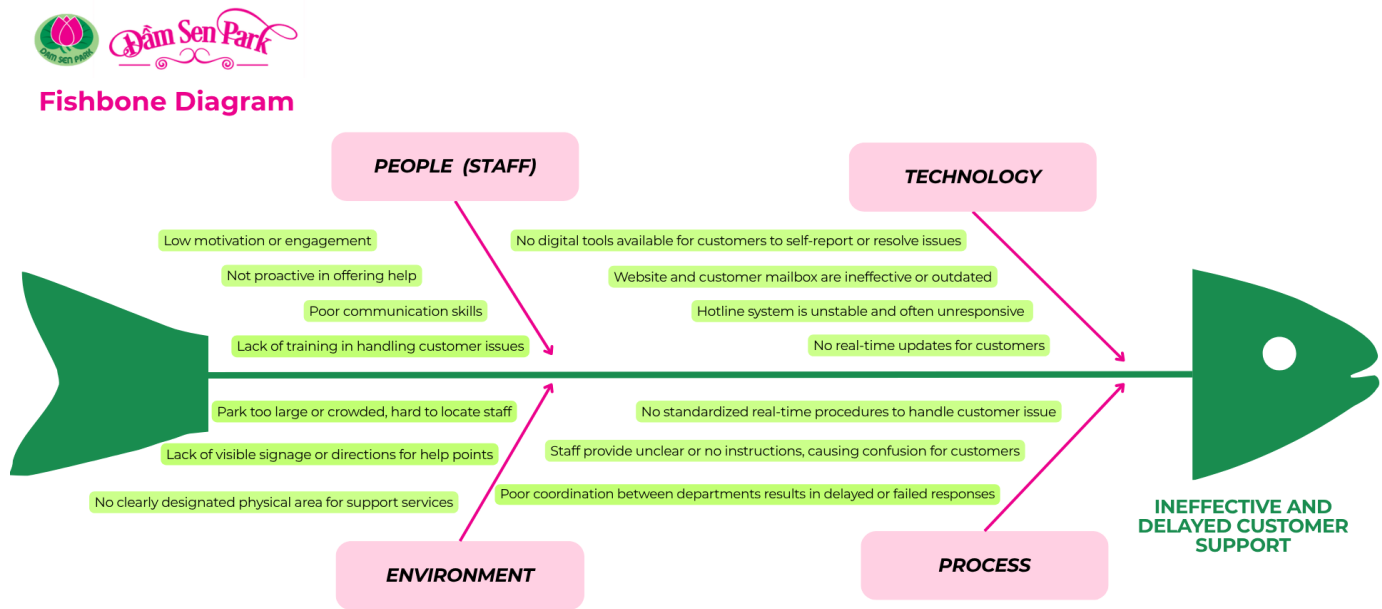

Figure 5. Fishbone Diagram

The fishbone (Ishikawa) diagram identifies the root cause of a problem from various perspectives (Sakdi Yah et al. 2022). Applied at Dam Sen, the diagram shows that the problem is not only about slow response but also related to employee skills, outdated technology systems, lack of signage, and fragmented internal processes. As a result, management can visualize the whole picture, identify key issues to improve service quality at Dam Sen, where customer experience is simultaneously influenced by many intersecting factors.

Service Gap Model

The Service Gap Model highlights mismatches between customer expectations and actual service (Parasuraman et al. 1985). At Dam Sen, two key gaps are evident:

- **Gap 1 – Knowledge Gap:** Dam Sen undervalues the importance of real-time, accessible support during unexpected incidents since they prioritize other operational activities over timely responsiveness (Jin, Lee & Lee 2015).
- **Gap 4 – Perceived Service Quality Gap:** While guests expect safety and fast responsiveness, they often face delays, untrained staff, and weak support systems which reduce customer trust and satisfaction (Sierra et al. 2015).

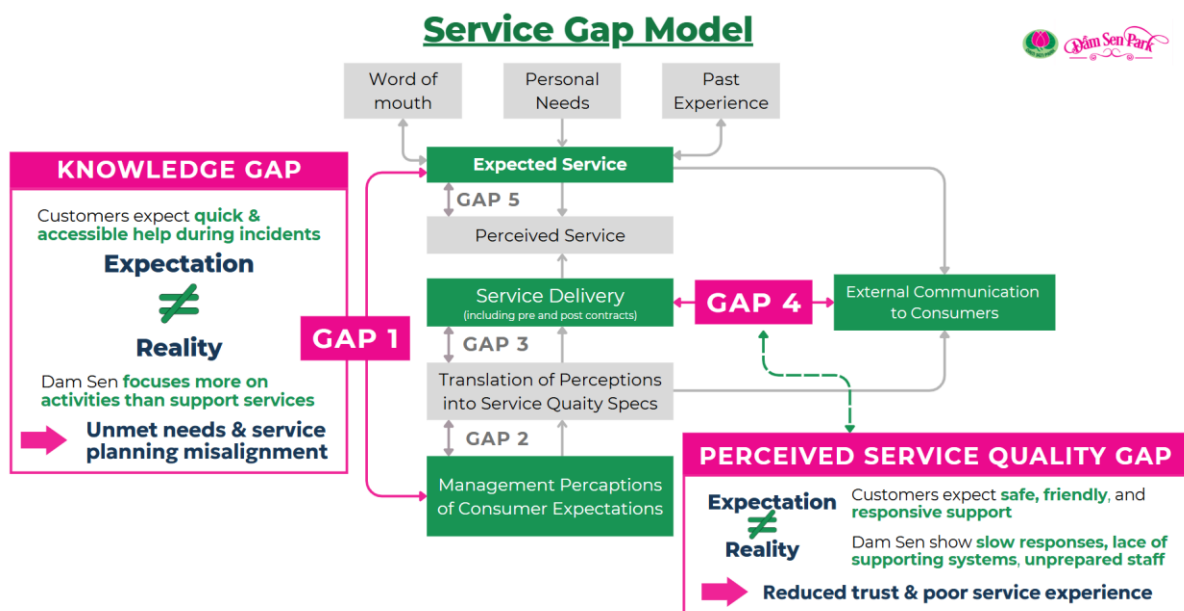

Figure 6. Service Gap Model

Flower of Service

The Flower of Service shows how core services are supported by supplementary elements to shape the overall customer experience (Wirtz & Lovelock 2022). At Dam Sen, several of these elements underperform. Slow and unfriendly staff reflect a lack of hospitality, leaving guests feeling unwelcome and unsupported. Unclear signage, no ride status updates, and a lack of guidance in emergencies. These issues leave visitors confused, unsupported, and undervalued. To enhance the core experience, Dam Sen must improve both service delivery and its key supporting functions.

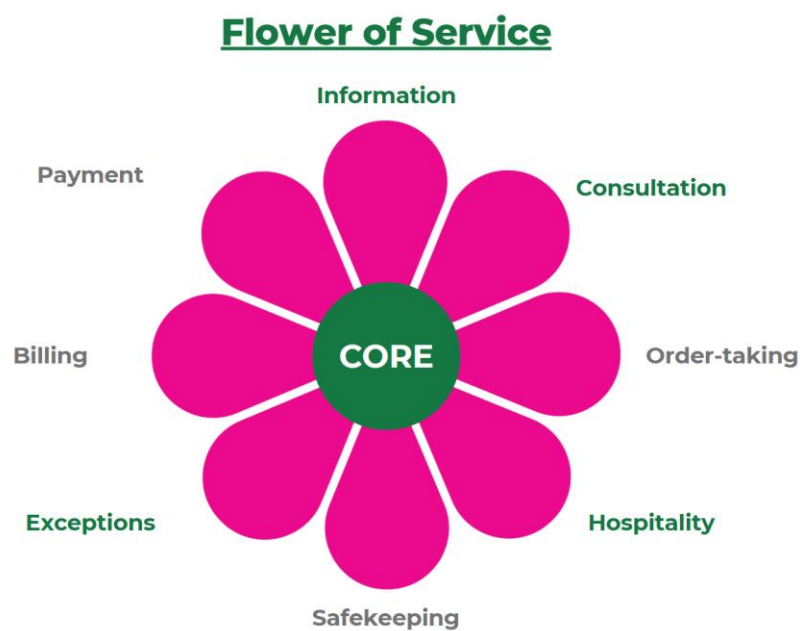

Figure 7. Flower of Service

2. Problem Research

a) Primary Research

To validate and deepen insights from secondary research, we conducted a six-person in-depth interview and a Google Form survey with 131 customers who visited Dam Sen (Appendix C). The analysis strongly reinforced three core issues: ineffective hotline support, unprofessional on-site staff and the absence of alternative support channels which are all significantly disappointing customers.

Qualitative

This qualitative analysis shows that frustration at Dam Sen stems from a build-up of pain points across the journey (Appendix D). A key issue was the anxiety caused by the lack of an efficient and accessible support system, especially for families. Hung (40, doctor) shared that when his child was injured, it “took too long to locate staff.” Similarly, Nguyet (28, HR officer) recounted how her lost son was only found by loudspeaker, showing a slow, inefficient response. Moreover, lack of real-time updates was another major frustration. Many were disappointed to find rides closed without warning. Hung said his family was “excited about a ride that was closed. No notice. Disappointed.” This made visitors feel their time and money weren’t respected. Finally, managing paper tickets also caused stress. Hung said keeping track of the whole family tickets “stressful.” Fear of losing or tearing tickets, especially with kids, was common, showing the need for a safer, digital solution.

Quantitative

Within the survey result in Figure 8 and Appendix E, the hotline’s inefficiency emerged as the most critical issue, with 75.5% of respondents agreeing that the hotline was either unreachable or responded too slowly. This left customers feeling abandoned during emergencies. Moreover, the problem was exacerbated by on-site support failures: 77.9% reported untimely assistance while the statement "staff lack skills and respond slowly" scored a mean of 3.84/5, highlighting perceived incompetence and passivity. Negative experiences had systemic consequences. 33.6% of respondents felt anxious or unsafe due to poor support, and 75.6% expressed overall dissatisfaction. The threat to customer retention was clear, with the statement "I may not return if service doesn’t improve" averaging 3.62/5, signaling an urgent need for intervention.

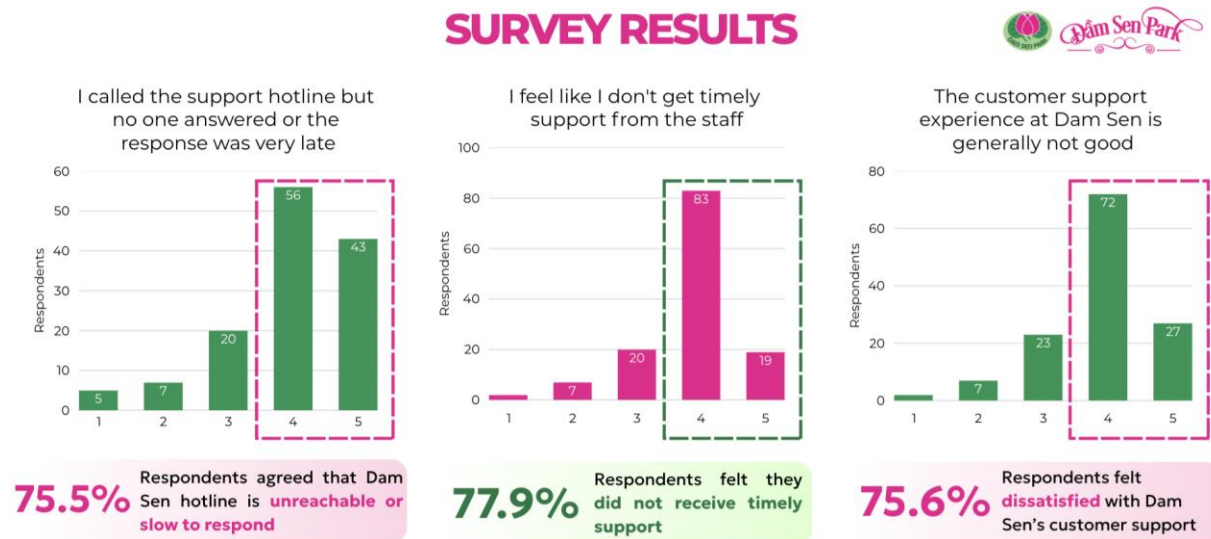

Figure 8. Survey results about supporting issues

Beyond support issues, customers criticized operational management when 86.3% were unaware of ride maintenance until arrival, and 85.5% cited frustration with paper tickets and the lack of e-ticket options (Appendix E). These inefficiencies, combined with weak support, created an unreliable experience.

b) Desk research (Secondary research)

Secondary data collected from Google Reviews and Tripadvisor reveals that many visitors express dissatisfaction with the quality of customer support, particularly in emergency situations. Specific complaints highlight difficulties in reaching the park's hotline or enduring prolonged wait times without adequate resolution, leaving guests feeling stranded in crowded, poorly guided environments (Appendix B.1). Additionally, some visitors reported attempts to contact the park via digital channels such as email, fan pages, or the official website only to receive no response or generic automated replies that failed to address their specific concerns (Appendix B.2). Further criticism centers on the attitude and preparedness of on-site staff. Multiple accounts describe employees as unfriendly or unwilling to assist during incidents like lost children, missing belongings, or first-aid needs. Guests noted confusion, passivity, and a lack of clear protocols among staff, undermining trust in the park's operational competence (Appendix B.3). These factors collectively contribute to visitor frustration and diminished satisfaction levels at Dam Sen Park.

3. Target Market Identification and User Persona Development

a) Defining the Core Market Segment

The target customers of Dam Sen are mainly local families with young children and local tourist groups from nearby areas (Dam Sen Park 2018). They want to spend a day with a short schedule and appreciate safety and convenience. According to Rojas de Gracia and Alarcón Urbistondo (2020), service issues in amusement parks can greatly affect the whole group's satisfaction, especially if children are involved, as one bad experience of one member can bring down the mood of others.

Customer Segment		Family with Young Children	Domestic Travel Group
Demographic	Age	Parents 25–45 years old, children 3–12 years old.	15–55 years old.
	Gender	All genders.	All genders.
	Income	Middle to high-income.	Middle income.
Geographic		Other provinces, mainly traveling to HCMC.	Other provinces and nearby areas.
Behavioural	Usage Rate	Occasional visitors, usually visiting the park for the first time.	Irregular visitors, primarily for leisure or local sightseeing.
	Benefit Sought	Desire fast, accessible support, safe family-friendly environment, easy navigation in park.	Prefer clear, easy-to-follow info and reliable, straightforward park facilities.
Psychographic	Concern	Highly concerned about child safety and need fast, accessible support.	Mainly concerned about getting accurate info and efficient service flow.
	Lifestyles	Family trips are tightly scheduled with limited park time.	Day trips, typically with flexible but simple plans.
	Personality	Easily stressed if child-related issues (lost, injured, confused) are not quickly resolved.	Tolerant of delays but may feel overwhelmed without clear navigation.

Figure 9. Target market

b) User Personas and Empathy Mapping

The customer personas and empathy maps help clarify the shared frustrations of three visitor groups at Dam Sen, despite differences in age and travel purpose (Appendix F). All experienced confusion and discomfort when seeking support to handle arising situations, often due to unclear information, unhelpful staff and slow or complex support processes, especially challenging for families with children or the elderly. Visitors usually heard complaints from their fellow travelers, saw confusion in other groups and felt they were not being supported in a timely manner, which reduced the quality of their trip. These negative feelings not only affected the individual but also spread to the entire group, highlighting the important role of timely and effective support services in the park experience. Therefore, most of them expected a simple, accessible and responsive support system to ensure a seamless experience throughout the trip.

MINH HUNG
MINH HUNG

Demographics & Geographics

- **Age:** 40 years old
- **Gender:** Male
- **Nationality:** Vietnam
- **Income Level:** Middle class
- **Occupation:** Doctor
- **Education:** College-educated
- **Location:** Ho Chi Minh City

GOALS

- Ensure a safe and smooth experience for the whole family
- Make the most of the day by exploring various areas
- Avoid long queues and unnecessary hassles

BEHAVIORS

- Plans ahead and checks park maps
- Constantly keeps an eye on the kids
- Seeks help from staff or nearby visitors when issues arise

MOTIVATION

- Wants to bring joy to his children
- Avoids negative experiences that could affect the family's mood
- Values saving time on queue, finding games and zones

CHALLENGES & FEARS

- Wastes time when rides stop unexpectedly without notice
- Worries about kids getting lost or not getting help fast enough
- Frustrated by slow or complicated incident resolution

INSIGHTS

As a busy dad traveling with my kids, I want to save time and quickly find suitable games for them, but I worry about getting lost or wasting time, so I need clear guidance and prefer using my phone for quick navigation.

**A MIDDLE-AGED
VISITOR WITH A
MULTI-GENERATIONAL
FAMILY GROUP**

ANH THU
ANH THU
ANH THU
ANH THU

Demographics & Geographics

- **Age:** 54 years old
- **Gender:** Female
- **Nationality:** Vietnam
- **Income Level:** Middle class
- **Occupation:** Retired
- **Education:** College-educated
- **Location:** Ho Chi Minh City

GOALS

- Spend quality time with family
- Relax and enjoy a peaceful day out
- Easily find areas suitable for both elderly and young grandchildren

BEHAVIORS

- Visits with a large group, often asks staff for directions
- Uses basic technology (Zalo, hotline,...) for guidance
- Observes surroundings, asks others to find information

MOTIVATION

- Values bonding time with children and grandchildren
- Enjoys green, quiet spaces
- Feels reassured when on-site staff are available to assist

CHALLENGES & FEARS

- Her grandchildren may lost
- Gets confused if signage is unclear
- Hesitant to walk too much without knowing the way
- Feels anxious if emergency support isn't available quickly

INSIGHTS

I need clear guidance and kind support when I'm struggle looking for places and manage my grandchildren. I'm also open to simple assistance on my phone, as long as it's easy to use and helps me feel more confident navigating the park and have a great time with my family.

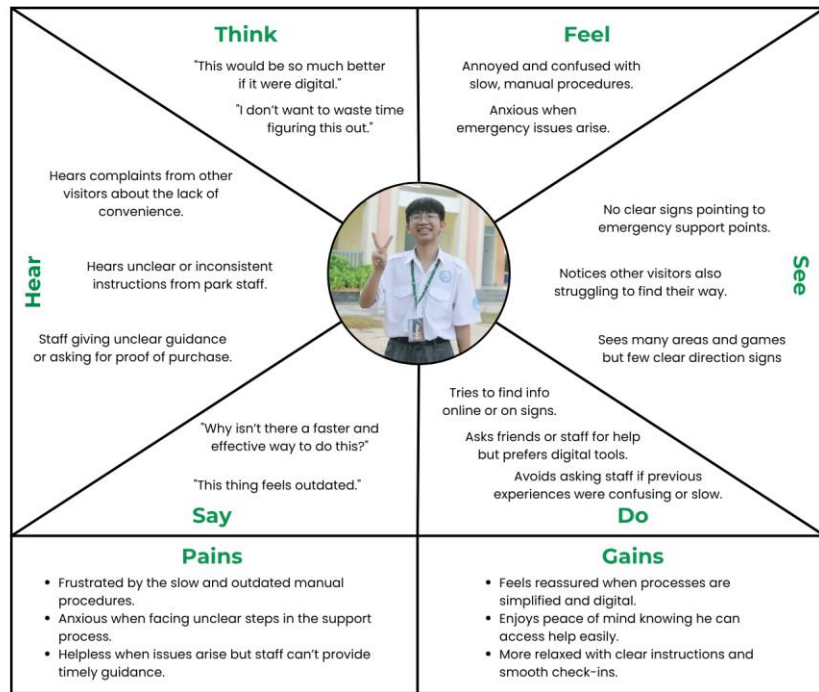

Figure 10. Customer Personas

About him

He is a high school student who visits Dâm Sen with his friends to relax and have fun after exams. As a digital-native, he prefers quick, modern solutions and gets easily frustrated with outdated systems.

- **Age:** 18 years old
- **Gender:** Male
- **Nationality:** Vietnam
- **Income Level:** Middle class
- **Occupation:** Student
- **Education:** Highschool
- **Location:** Ba Rịa - Vũng Tàu

About him

He is a busy father who rarely has time for family outings. He values safety, convenience, and efficiency in his family's timeout.

- **Age:** 40 years old
- **Gender:** Male
- **Nationality:** Vietnam
- **Income Level:** Middle class
- **Occupation:** Doctor
- **Education:** College-educated
- **Location:** Ho Chi Minh City

About her

She is a middle-aged grandmother who usually spends time with her grandchildren. She is familiar with using basic technology (smartphone, internet) and wants a safe, and enjoyable trip.

- **Age:** 54 years old
- **Gender:** Female
- **Nationality:** Vietnam
- **Income Level:** Middle class
- **Occupation:** Retired
- **Education:** College-educated
- **Location:** Ho Chi Minh City

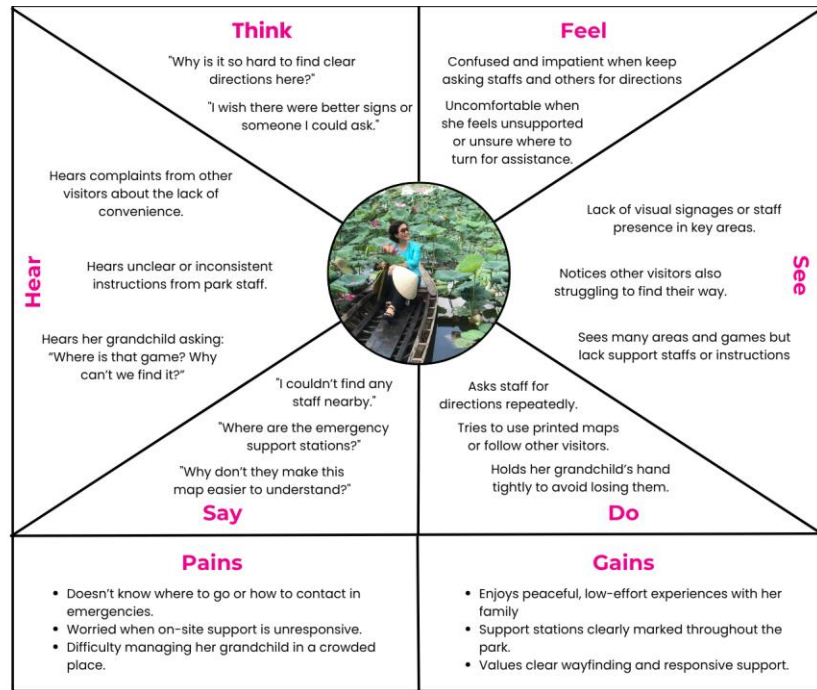

Figure 11. Customer Empathy Maps

4. Brainstorming Solutions

a) Idea generation

At this stage, our focus is coming up with as many ideas as possible to solve the problem of poor customer support, both online and on-site, which causes slow responses and a bad experience for visitors. Firstly, we use the mind mapping tool to boost creativity and generate possible solutions. The proposed solutions include a help center mobile app, a QR code system linked to a website, a staff incentive program, customer service via Messenger or Zalo, on-site digital kiosks, and a temporary service booth.

Figure 12. Idea Generation

b) Filtering Ideas and Defining the Innovative Solution

In order to find the best option among those, we use the DVF Framework to screen all the aforementioned ideas (O'Donoghue 2023). The results from the DVF Framework show that the mobile app is the solution that has the highest score (Appendix G).

Each criterion has a maximum score of 5

Scoring scale: **1 (Low) – 5 (High)** *[Higher total score = more suitable solution]*

Figure 13. Filtering ideas by using DVF Framework

This brand new app for Dam Sen will be a multi-function app. The app is expected to address poor customer service, handle minor issues, and improve prompt support for visitors. It will also enhance the overall experience by offering real-time updates and interactive features. By combining convenience and smart features, the app will turn every visit into a more seamless and fun experience.

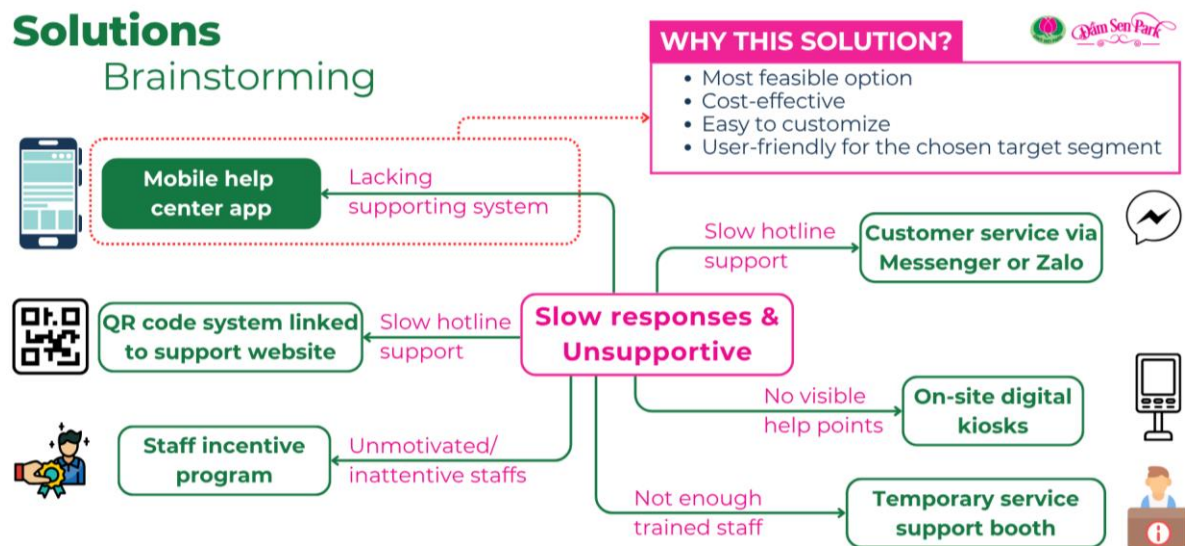

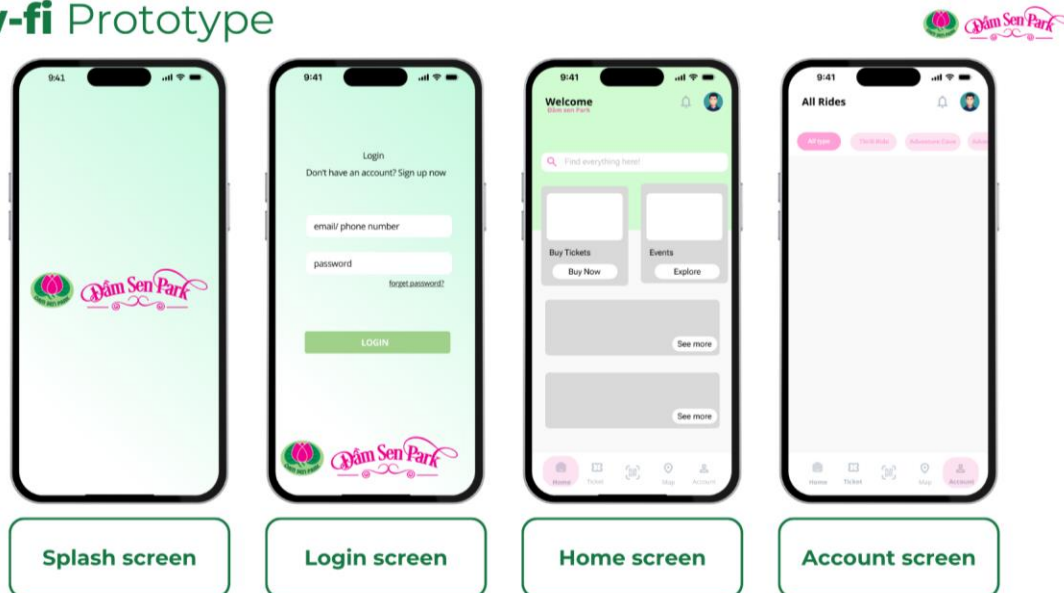

Figure 14. Solution Brainstorming Board

5. Designing and Testing the Low-Fi Prototype

The Help Center App is designed to enhance the service experience at Dam Sen Cultural Park. By addressing key service issues, the low-fi prototype was developed with two core features: A real-time interactive map displaying the live status of rides and an online ticketing system that streamlines the purchasing process.

Low-fi Prototype

Low-fi Prototype

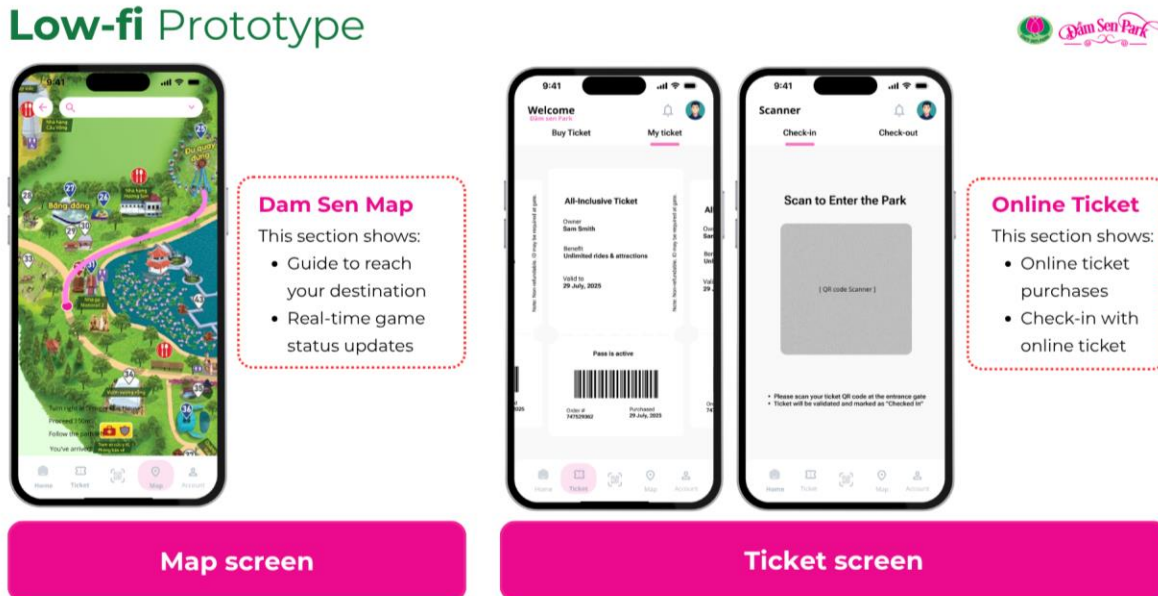

Figure 15. Low-fi prototype with basic features

a) User Testing

For testing, a short, semi-structured interview was conducted with a small group of 6 target users. Participants were asked to view and give feedback for basic app UI wireframes, including the map interface and the ticket section.

b) Obtaining feedback from users

The results showed interviewees' strong interest and optimism toward the app idea. The **real-time map** was the highest-rated feature for its clear and useful navigation support within the park. However, users suggested some enhancements with live ride status updates to help them plan activities more efficiently. As for the **ticketing system**, many expressed concerns that the system was not reflective of Dam Sen's actual ticket structure and expected a wider range of ticket options. Additionally, some recommended a feature to store purchased tickets for scanning or verification after each ride. Another major function in demand is the emergency support system. Respondents emphasized the importance of an emergency support button, categorized by scenario and linked to geolocation to assist staff in quickly supporting customer problems. Lastly, users recommended integrating an AI-powered chatbot to assist basic inquiries such as restroom locations, dining options, etc.

Nguyet - HR officer - Domestic Travel Group
*The **navigation map** is great, it helps me get around easily. But I'd love if it could show which rides are **open/ under-maintenance** in real-time. It'd save a lot of time and help me plan better.*

Minh Hoang - Student - Domestic Travel Group
*The current ticket section looks simple, but it doesn't show Dam Sen's **actual ticket options**. I expect to choose between general admission, combo tickets, or pay-per-ride ones like in real life*

Tien - Elderly - Domestic Travel Group
*It'd be really helpful if the app **saved my purchased tickets** so I could just **scan** them at each ride. Right now, I'm not sure how I'd re-access the ticket after check-in.*

Thu - Housewife - Family with Young Children
*One thing missing is **an emergency button**. If I **lost stuff, my kid wandered off, or needed first aid**, I'd want to alert staff immediately, ideally with my location so they can find me faster.*

Hung - Doctor - Family with Young Children
*"I don't want to keep **finding staff** just to ask where the restroom or food stalls are. A **chatbot** that answers basic questions would be super convenient, especially when it's crowded."*

Van - Engineerer - Family with Young Children
*"Sometimes, my kids just hungry but don't know what's near. A filter to **show nearby food** by price or type would be perfect."*

Figure 16. Feedback for Low-fi prototype with basic features

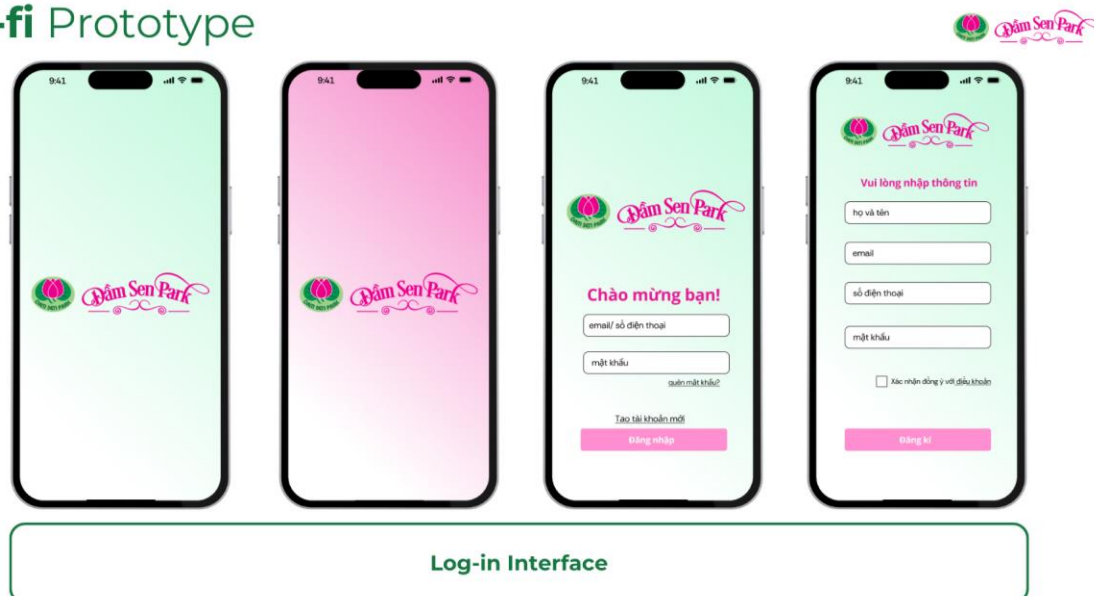

c) Prototype Modification

Acknowledging users' feedback, key changes were made to the prototype to meet user needs and enhance usability. First, AI chatbot was integrated to provide real-time assistance with ride information and basic FAQs. Second, an emergency help button was introduced with common scenarios (lost child, missing item, medical need), each linked to geolocation for faster staff response. Third, the real-time map was upgraded to display ride status (open/closed/under-maintenance) and estimated distance to selected attractions. Finally, the ticketing system was refined to include both entry and ride pass options, along with digital check-in, ticket history, and loyalty program features. These updates are made to the hi-fi prototype to help Dam Sen give better service experience and form a seamless, self-directed, and responsive ride for visitors.

6. Testing and evaluating the Hi-fi prototype

The hi-prototype builds on the low-fi version by enhancing visual design, improving navigation, and adding interactive elements. It features a smart AI Chatbot, and refined user flows for both the real-time map and ticketing functions. These updates aim to deliver a more engaging, intuitive, and responsive experience for park visitors (instruction video in Appendix H).

Figure 17. Hi-fi prototype

a) Obtaining Feedback for Improvement

We showed the prototype and let everyone in the class to experience (Appendix _). The initial reaction to our prototype was very positive. Everyone found the interface quite user-friendly and interactive. Nevertheless, we received suggestions to improve the visual design of some sections, such as the ticket booking page. Everyone got excited about the real-time map feature. However, the app did not function smoothly at times, which affected the overall user experience. Additionally, the AI Chatbot should have a more humorous tone when replying to customers. Therefore, our group needs to work on that.

Participant	Feedback
Dr. Phuong Nguyen	The AI chatbot needs to be more lively and personified to create a friendlier impression for users. The current chatbot responds in a very serious and proper manner, which may feel less engaging to users.
Pham Thuy Vy (Group 1)	I find the app interface easy to use. With further development, it could be used directly by businesses and put into practical use right away.
Pham Hoang Minh Trang (Group 1)	She confused "waiting time" on the real-time map with queue time. (It was a typo as we actually meant game playtime)
Tran Huu Trinh (Group 7)	When I used the app, it felt a bit slow, so I hope your team can work on making it run more smoothly.
Huynh Le Phuc Khang (Group 5)	What interests me is the digital map for Dam Sen. It's so convenient to navigate the park and find nearby attractions

Figure 18. In-class Feedback

b) Prototype Refinement and Improvement

After obtaining the feedback, we will add one more ‘AI Chatbot’ button beside the emergency button to differentiate normal conversations from emergency ones by separating them into two distinct buttons. The new AI Chatbot is trained and developed to be more humorous and less serious than the current one, aiming to create a more engaging experience for users. Moreover, we personify the chatbot by creating a mascot and naming it ‘Bé Sen’ to make it more friendly. Some parts of the app, like the ticket booking screen and user account section, are not visually appealing, so we will continue to improve the UI/UX in these areas.

Figure 19. Bé Sen – the New Mascot for the AI Chatbot (See more in Appendix J)

c) Risk Assessment

We identify four major risks, which are personal data leakage due to cyberattacks and hacking, system downtime, negative user experience and limited Internet accessibility. All these risks are classified according to their likelihood and impact. In addition, appropriate measures are suggested to minimize their potential negative effects on Dam Sen. Regular system updates and strong cybersecurity measures can help reduce the risks of cyberattacks and system downtime. The mobile app will be tested thoroughly to minimize negative user experiences. Moreover, Wi-Fi and internet coverage will be enhanced to ensure better accessibility throughout the park.

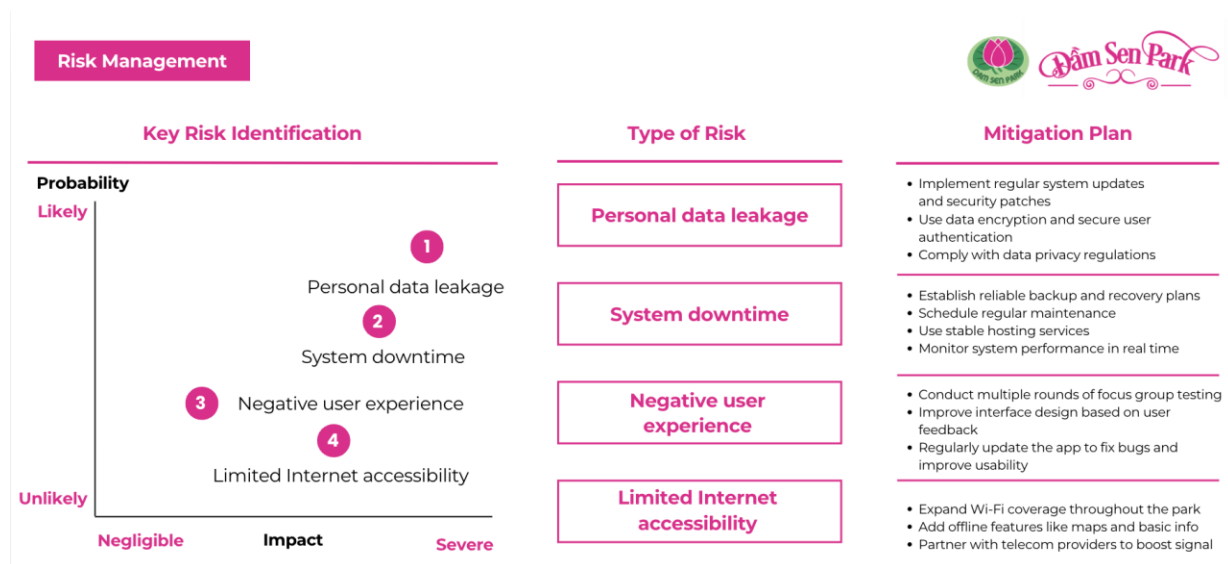

Figure 20. Risk Assessment and Management

7. Design a better service

a) Final Model

The detailed process for other functions such as ticket booking, real-time map and chat support is shown in Appendix K.

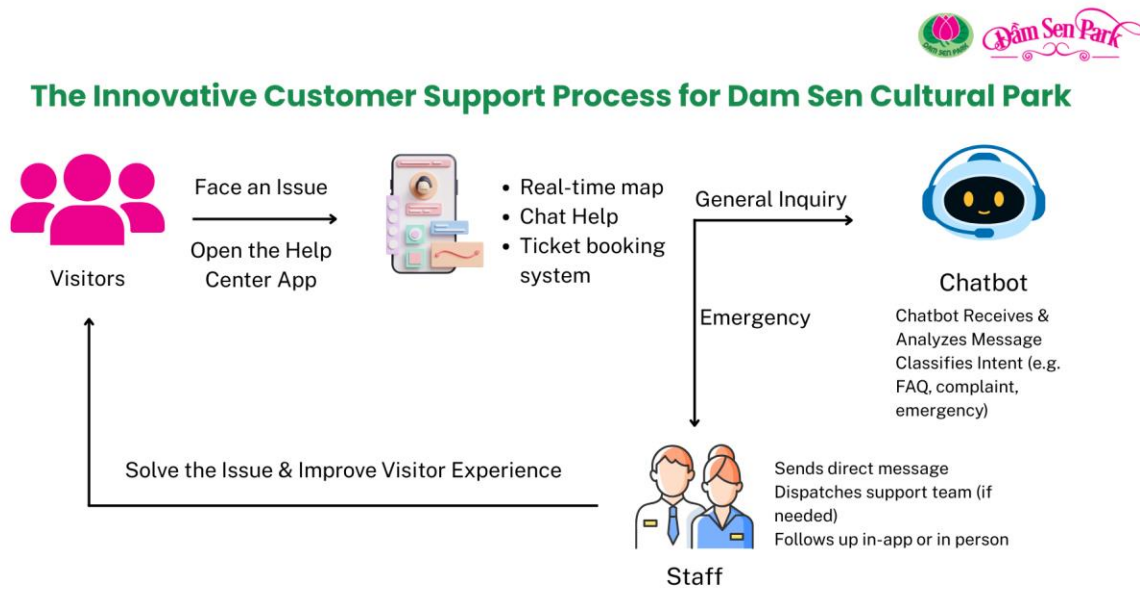

Figure 21. Final Service Model of Dam Sen

b) Final App Mock-up Images

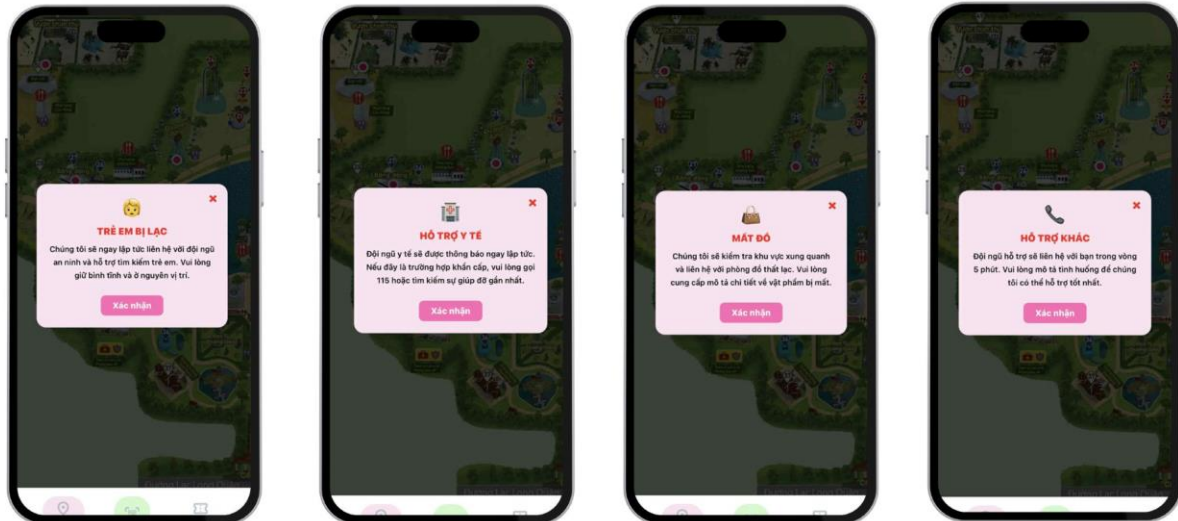

Finalized version of the application

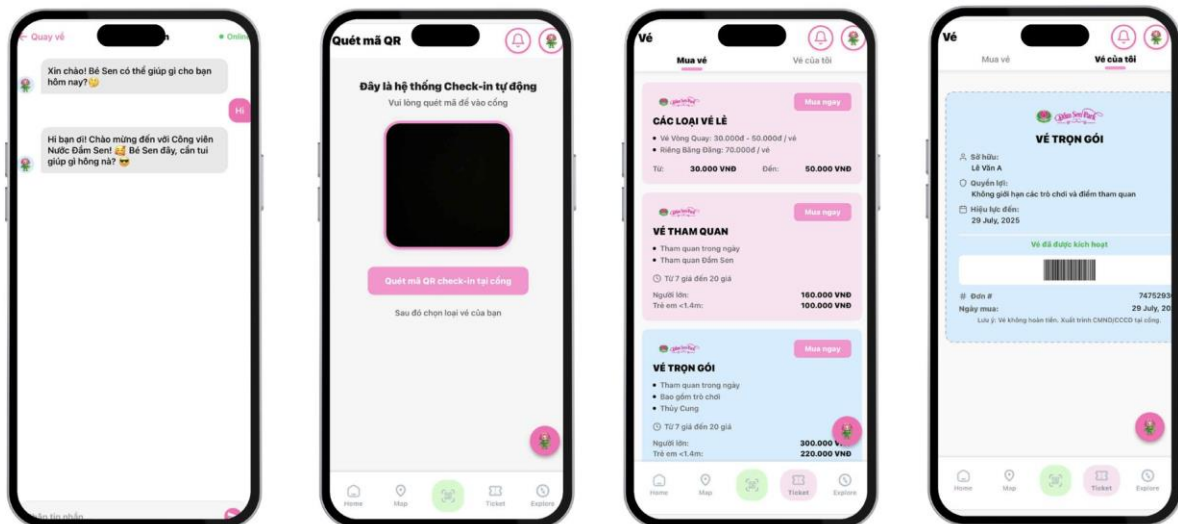

Finalized version of the application

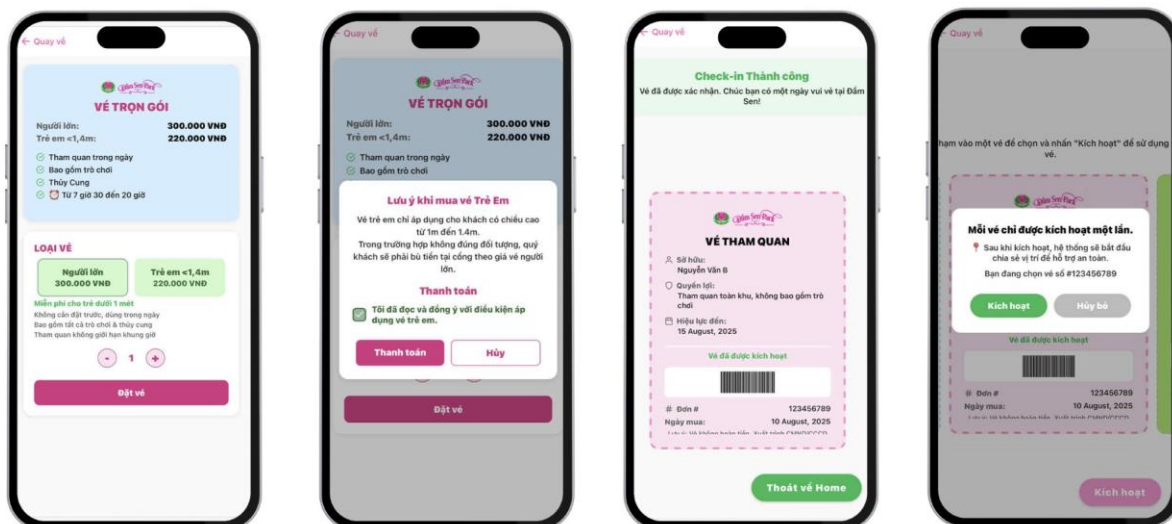

Finalized version of the application

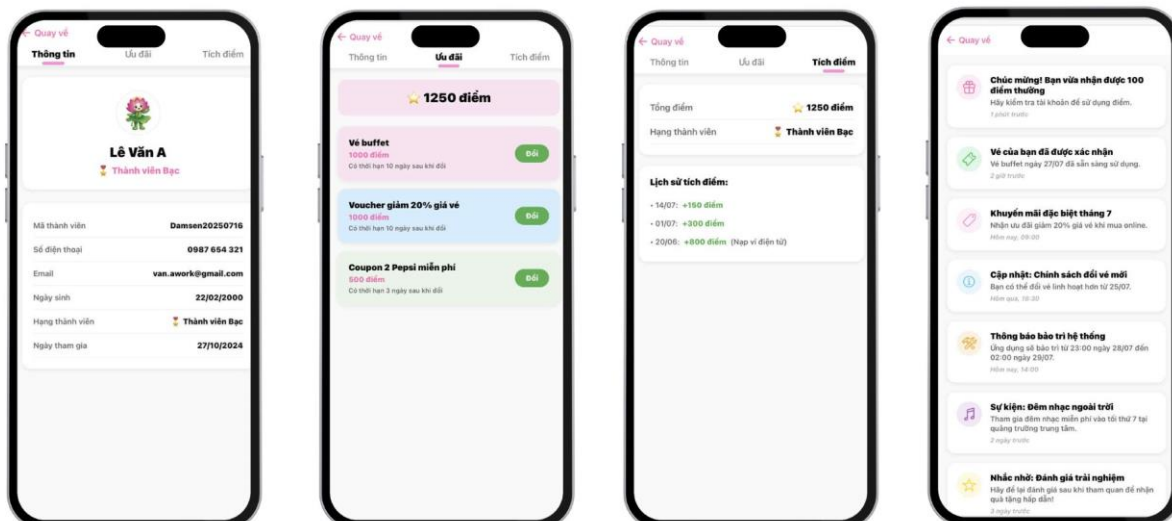

Finalized version of the application

Finalized version of the application

Finalized version of the application

c) Why This Solution is an Improvement

This solution offers a significant improvement by centralizing support and services into one user-friendly app. Unlike traditional methods like hotline or physical booths, the app provides instant access to key functions, which enables customers to receive timely support. The AI-powered chatbot reduces staff workload by handling basic inquiries and automatically forwarding urgent cases to the right team. This aligns with the research showing that automation and AI can reduce costs and improve productivity for businesses (Er 2024). Real-time updates help visitors plan their routes efficiently and avoid rides under maintenance, saving time and frustration. Thus, visitors can know in advance which rides are unavailable, reducing dissatisfaction since effective business communication is key to improving customer satisfaction (Begum 2021). Overall, this digital solution enhances service speed, reduces delays, and improves the visitor experience at Dam Sen Cultural Park.

Prototype Access Instruction

#1 Scan the QR code to access the prototype, or find the link in the Appendix.

#2 For the best experience, we recommend accessing the prototype on a mobile phone, as it is not optimized for laptops or desktops.

Appendix A: About Dam Sen Cultural Park

1. Overall

	ĐÀM SEN CULTURAL PARK
ADDRESS	3 Hoa Binh Street, Ward 3, District 11, Ho Chi Minh City
AREA	Approximately 50 hectares: 60% greenery & gardens, 20% water surface
HISTORY	Pre-1975: Swamp area 1976-1978: Renovated under city planning 1983: Assigned to District 11 for management 1989: Operated by Phu Tho Tourism Company 2003: Became a member of Saigontourist
VISION - MISSION	To develop Dam Sen into a leading cultural and entertainment center in Southern Vietnam, aiming for international standards, continuously improving, investing in new games, hotels, tourism, and spa services.
MAIN AREAS & ZONES	30 subdivisions: gardens, aquarium, lotus lake, Roman square, Japanese garden, musical fountain stage, thrill rides, ice play area, orchid and bonsai garden, bird and animal zones, monorail...
MANAGEMENT	Currently managed by Phu Tho Tourism Services JSC – Saigontourist

2. Logo

3. Opening hours

 Opening day 7 days/week	 Ticket sales hours Monday - Thursday: 7:30 am - 5:00 pm Friday - Sunday: 7:30 am - 7:00 pm	 Hours of Operation Monday - Thursday: 7:30 am - 6:00 pm Friday - Sunday: 7:30 am - 8:00 pm
--	--	--

4. Ticketing

- **"Tickets purchased at the gate"** are tickets sold at the two main gates number 1A Lac Long Quan (or number 3 Hoa Binh), gate number 2 (Thuy Ta restaurant).
- **In-park tickets** : are tickets sold at counters in the park. These are all-inclusive tickets that have already deducted your entrance fee.
- **Tickets from the Water Park gate** : are tickets sold from the connecting gate of the water park. These tickets are for visitors who have fun at the water park and want to go to Dam Sen Cultural Park.
- **>1.4m** : people over 1.4m tall
<1.4m : people under 1.4m tall
- **Children under 1m are free** , but must be accompanied by an adult.
- **With invitation ticket, get 50% discount on package ticket** (applicable for purchase at the gate).

ADMISSION TICKETS

From 7:30 to 20:00

- ✓ Day Tour
- ✗ Includes game
- ✗ Electric-vehicle service

Appendix B: Evidences on the service problem

1. Lack of timely support

**Dat Tran**
1 review

★★★★★ a year ago

300k/1 người trọn gói chưa bao gồm thủy cung, cá massa và xe điện. Đi chơi mà ko có nhân viên trực trò chơi rất nhiều trò vậy chúng tôi bỏ ra số tiền đó phải ngồi đợi nhân viên .mún chơi trò đó phải đợi phải đi hỏi người điều khiển trò đó đâu. Nhân viên thờ ơ coi thường. Tuy bất ngày trong tuần vắng . Mình đi nhóm 4 người Chắc chơi được tầm 10 trò lại thì không ai hướng dẫn. Có mún quay lại không mình xin phép là KHÔNG.

HI VỌNG MỌI NGƯỜI ĐỌC HẾT PHẦN ĐÁNH GIÁ NÀY VÀ SUY NGHĨ KĨ CÓ NÊN ĐI KHÔNG NHA ^^ (KHÔNG NÊN)

Mình đi hôm 18/10 gần lễ đi 5 người và mua vé silver trọn gói tất cả trò chơi. Cực kì thất vọng khi có rất nhiều trò không hoạt động, hỏi thì cứ bảo hư bảo trì và không chơi được. Không biết có thật sự hư không hay ít người quá nên không thêm cho máy chạy :)) mình có gọi lên số hotline để hỏi thì họ bảo không có trò nào đang ngừng cả :)) nhân viên không nhất quán được với nhau, mình bảo mình đang trong công viên chơi nhưng có rất nhiều trò không hoạt động, bên tư vấn khách hàng bảo mình để lại số điện thoại để họ gọi cho những bên còn lại xác nhận rồi báo cho mình :)) và đến hết ngày luôn vẫn không có một cuộc điện thoại nào :)) VẬY THÌ ĐẸP CÁI GÓI SILVER DÙM CÁI NHÉ, 380k CHƠI KHÔNG ĐƯỢC GÌ THÌ ĐẸP DÙM CÁI NHÉ

Dịch vụ khá tệ. Gởi thư góp ý còn không thêm phản hồi luôn. Còn số hotline gọi vào hỏi thì trả lời tào lao cho có.

Thông tin thời gian hoạt động thì không cập nhật trên web, Bữa giao thừa không biết có mở cửa không phải đến nơi mới biết có mở cửa. Vào rạp hàng mua vé thì máy tính bán vé lỗi ai cũng phải chờ vì không in được vé.

Xe lửa chở khách tham quan vòng quanh đầm sen không chạy thường xuyên. Toàn đậu ngay gần cổng ra vào, chỉ khi có khách mới chạy, khách ở trong thì lợi bộ ná thờ.

Nên mua vé trước qua mạng rẻ hơn nua tại cổng nếu đi buổi sáng.

Khu nhà liên hoàng cho trẻ em còn không ai lau dọn. Bụi nó đóng lớp lớp.

Gởi mail góp ý còn không ai trả lời luôn.

3. Staffs' bad attitudes when customers need helps

Bị nhân viên tỏ thái độ và chửi khi chơi trò cảm giác mạnh, nhân viên còn không chỉ cách cài thiết bị an toàn và bấm đt.

thg 5 năm 2024 • Bạn bè

Nhân viên rất thái độ khi chơi trò cảm giác mạnh gần cổng 1. Có tận 2 người chửi tôi mà không nói năng gì những người khác. Tôi rất thất vọng vì thái độ của các bạn.

Bảo vệ ngay cửa vào công viên nước rất thiếu trách nhiệm! Đồng ý là có quầy gửi đồ nhưng khách lỡ mất đồ thì phải bảo vệ khách hoặc nói gì cho khách an tâm! Trả lời cực kỳ mất dạy, "khách mất đồ ráng chịu" má nó!

Quá tệ, trò chơi rất mất an toàn, ko hề có dây đai ở trò chơi thuyền vượt thác, tôi đã bị đập gãy xương, nhân viên có thái độ khó chịu, cảm râm khi tôi gặp tai nạn và hoàn toàn ko giúp đỡ hay hỗ trợ gì, tự tôi phải đi bộ từ trò chơi ra cổng, tự sơ cứu và cấp cứu ở bv, bác sĩ kết luận gãy xương

Appendix C: In-depth interview questions

In-depth Interview Questions

Personal Info	1	Name
	2	Age
	3	Occupation
BUYING TICKETS	4	When was the last time you visited Đầm Sen, who did you go with, and for what purpose? (e.g. entertainment, attending events, hanging out with friends, etc.)
	5	- How did you buy entrance and ride tickets? (Online or on-site?) → Follow up: Did you find buying and keeping paper tickets convenient? (Have you ever lost, forgotten, or had trouble with them?)
	6	- How was your ticket buying experience? (Was it easy? Did you have to queue up for long?)
	7	-What do you think if there was an app that allows storing e-tickets and checking in via QR code?
NAVIGATION	8	- During that trip, did you have any difficulty navigating Đầm Sen? (e.g. couldn't find the game area, wandered around, had to ask staff multiple times?
	9	- Did you go with children or elderly people? If yes, did park navigation affect your experience?
	10	-Did you and your group do anything to solve it?
	11	Would a smart map on your phone showing your location and nearby games be helpful for you?
STAFF SUPPORT	12	- Have you ever encountered a situation where you needed staff assistance? (e.g. got lost, had an issue, couldn't find WC/food court, game stopped working...)
	13	- How did you contact for help in that situation? Did you encounter any difficulty?
	14	If there were an app with an emergency support button and location sharing, how do you think that could help?

UNDER - MAINTENANCE	15	- Have you ever gone to a ride that was closed or under maintenance without prior notice?
	17	- How did you feel?
	18	Do you think getting updates on changes (like closed rides, promotions, events...) on your phone would make your trip better?
PROTOTYPE TESTING	19	- If there were an all-in-one app with features like smart map, emergency button, support chat, ticket storage, ride notifications, etc., which feature would interest you most? Why?
	20	- Is there anything that would make you hesitant or willing to use this app? (e.g. battery drain, don't want to download, afraid it's hard to use?)
	21	What are your comments (satisfaction and improvement points?) after using the demo app?
	22	Do you have any other suggestions to make your Đầm Sen experience more perfect for you and your family?

Appendix D: Survey Questionnaire

QUESTIONNAIRE

PART A - GENERAL INFORMATION

1. Your Gender:

- Male
- Female

2. Your Age:

- Under 18 years old
- 18 -25 years old
- 26 - 35 years old
- Above 35 years old

3. What is your occupation?

- Students
- Office workers
- Freelance entrepreneurs
- Homemakers

4. Who did you go to Dam Sen with?

- Alone
- With friends
- With family
- With a tour group

PART B – DETAILED EVALUATION OF CUSTOMER SUPPORT EXPERIENCE

Scale:

- 1 – Strongly Disagree
- 2 – Disagree
- 3 – Neutral
- 4 – Agree
- 5 – Strongly Agree

Statements:

- I have experienced difficulty finding support staff when facing an issue in the park.
- There were no clear signs or easily located support counters, which caused delays when I needed assistance.
- The support staff were not proactive and waited for customers to ask first.
- When I need assistance, I feel that the staff lack the necessary skills and respond slowly.
- I called the support hotline but no one answered or the response was very late.
- I feel I am not given clear guidance when faced with unexpected situations or problems.
- I feel like I don't get timely support from the staff.
- Poor support experiences made me feel anxious or unsafe during my time in the park.
- The support experience negatively impacted my group or family's trip.
- I was disappointed that the support service was not as expected in a large theme park like Dam Sen.
- The customer support experience at Dam Sen is generally not good.
- If Dam Sen doesn't improve their customer support, I will consider not coming back.

PART C - OTHER PROBLEMS

Scale:

- 1 – Strongly Disagree
- 2 – Disagree
- 3 – Neutral
- 4 – Agree
- 5 – Strongly Agree

Statements:

- Dam Sen is too big and I feel the map is not convenient for visitors.
- Information on the operational status of games is not provided fully and promptly.
- I was not informed that the ride was under maintenance until I arrived at the location.
- Paper tickets are easily torn or lost, which causes inconvenience for customers.
- The lack of an e-ticket option makes purchasing and using tickets less flexible.

PART B – DETAILED EVALUATION OF CUSTOMER SUPPORT EXPERIENCE

Statement	Mean	Maximum
I have experienced difficulty finding support staff when facing an issue in the park.	3.49	5
There were no clear signs or easily located support counters, which caused delays when I needed assistance.	3.47	5

PART B – DETAILED EVALUATION OF CUSTOMER SUPPORT EXPERIENCE

1. I have experienced difficulty finding support staff when facing an issue in the park.

Tôi từng cảm thấy khó khăn trong việc tìm nhân viên hỗ trợ khi gặp vấn đề trong công viên. (I have experienced difficulty finding support staff when facing an issue in the park)

131 responses

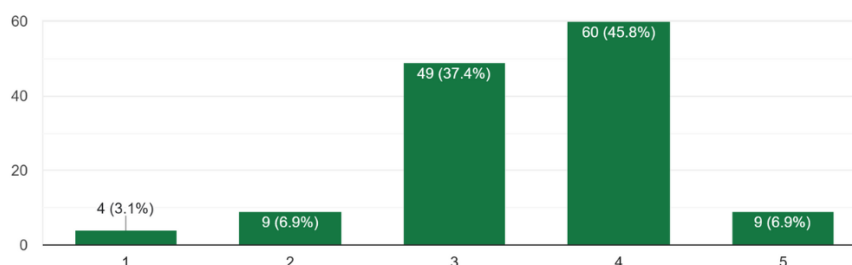

2. There were no clear signs or easily located support counters, which caused delays when I needed assistance.

Không có bảng chỉ dẫn rõ ràng hoặc quầy hỗ trợ dễ tìm khiến tôi mất thời gian khi cần trợ giúp.

(There were no clear signs or easily located support counters, which caused delays when I needed assistance)

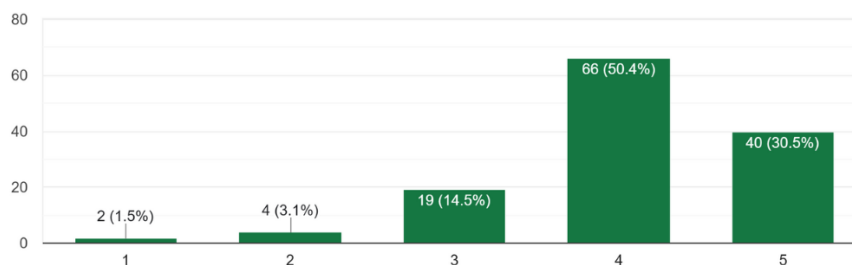

131 responses

3. The support staff were not proactive and waited for customers to ask first.

Nhân viên hỗ trợ không chủ động giúp đỡ khách hàng mà chờ khách phải hỏi trước. (The support staff were not proactive and waited for customers to ask first)

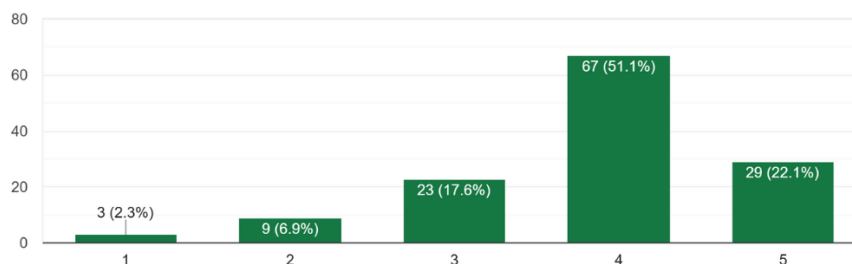

131 responses

4. When I need assistance, I feel that the staff lack the necessary skills and respond slowly.

Khi cần trợ giúp, tôi cảm thấy nhân viên thiếu kỹ năng và phản hồi chậm chạp. (When I need assistance, I feel that the staff lack the necessary skills and respond slowly)

131 responses

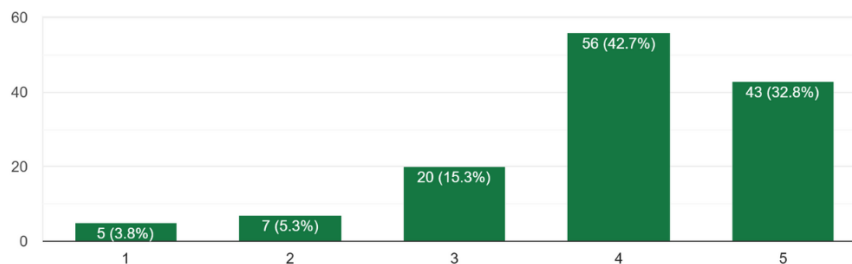

PART B – DETAILED EVALUATION OF CUSTOMER SUPPORT EXPERIENCE (CONT.)

5. I called the support hotline but no one answered or the response was very late.

Tôi từng gọi hotline hỗ trợ nhưng không có ai bắt máy hoặc trả lời rất trễ. (I called the support hotline but no one answered or the response was very late)

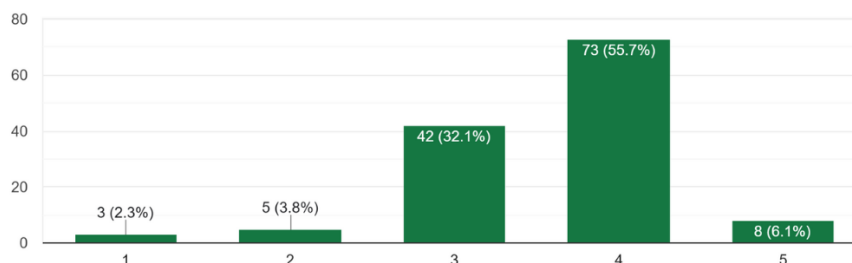

131 responses

6. I feel I am not given clear guidance when faced with unexpected situations or problems.

Tôi cảm thấy không được hướng dẫn rõ ràng khi gặp tình huống bất ngờ hoặc sự cố. (I feel I am not given clear guidance when faced with unexpected situations or problems)

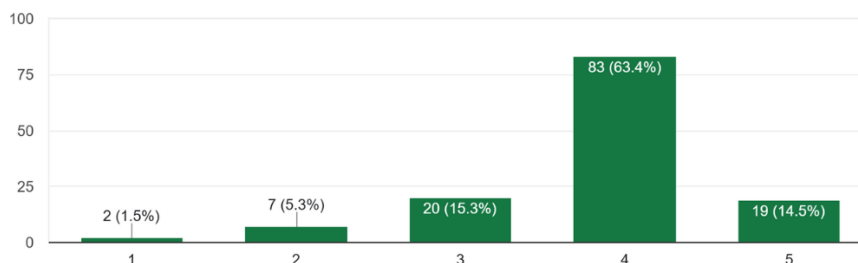

131 responses

7. I feel like I don't get timely support from the staff.

Tôi cảm thấy mình không nhận được sự hỗ trợ kịp thời của nhân viên. (I feel like I don't get timely support from the staff)

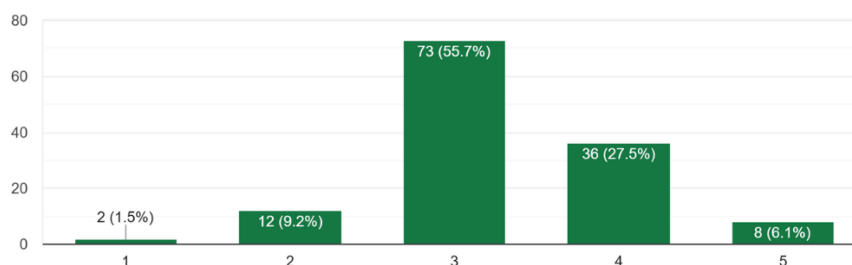

131 responses

8. Poor support experiences made me feel anxious or unsafe during my time in the park.

Trải nghiệm hỗ trợ kém khiến tôi cảm thấy lo lắng hoặc mất an toàn trong thời gian ở công viên. (Poor support experiences made me feel anxious or unsafe during my time in the park)

131 responses

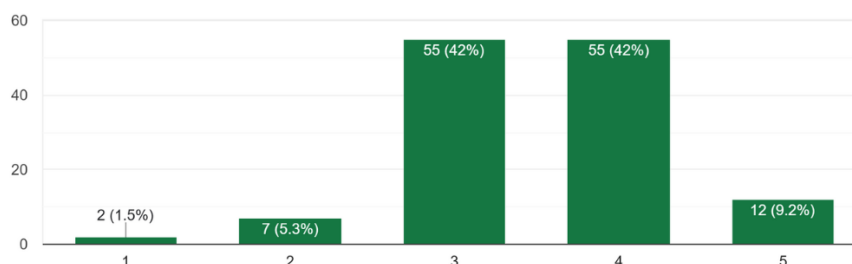

PART B – DETAILED EVALUATION OF CUSTOMER SUPPORT EXPERIENCE (CONT.)

9. The support experience negatively impacted my group or family's trip.

Trải nghiệm hỗ trợ gây ảnh hưởng tiêu cực đến chuyến đi của cả nhóm hoặc gia đình tôi. (The support experience negatively impacted my group or family's trip)

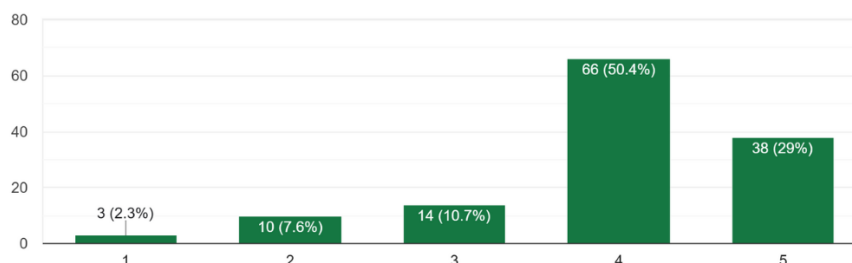

131 responses

10. I was disappointed that the support service was not as expected in a large park like Dam Sen.

Tôi thất vọng vì dịch vụ hỗ trợ không như kỳ vọng ở một công viên lớn như Đầm Sen. (I was disappointed that the support service was not as expected in a large park like Dam Sen)

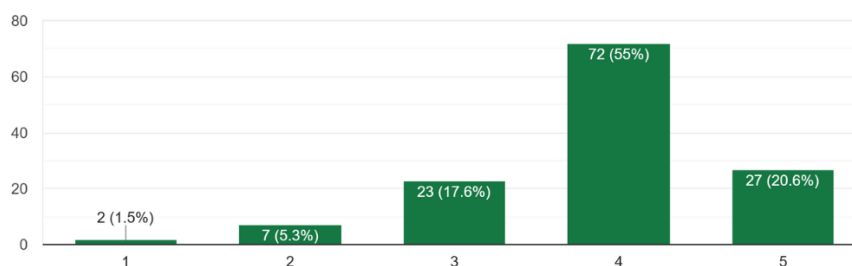

131 responses

11. The customer support experience at Dam Sen is generally not good.

Trải nghiệm dịch vụ hỗ trợ khách hàng tại Đầm Sen nhìn chung không tốt. (The customer support experience at Dam Sen is generally not good)

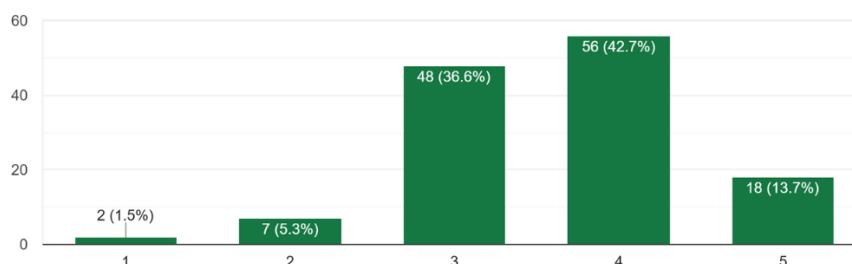

131 responses

12. If Dam Sen doesn't improve their customer support, I will consider not coming back.

Nếu Đầm Sen không cải thiện hỗ trợ khách hàng, tôi sẽ cân nhắc không quay lại. (If Dam Sen doesn't improve their customer support, I will consider not coming back)

131 responses

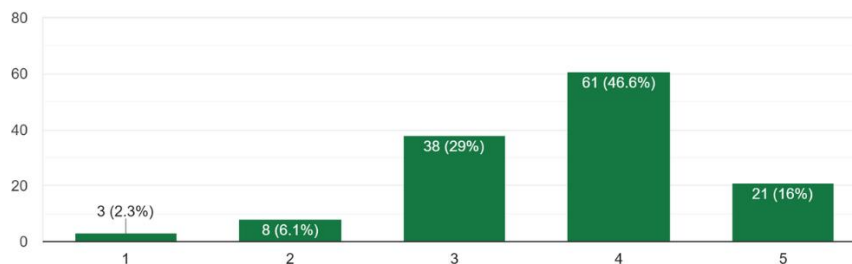

PART C - OTHER PROBLEMS

1. Dam Sen is too big and I feel the map is not convenient for visitors.

Đầm Sen quá lớn và tôi cảm thấy bản đồ chỉ dẫn chưa thuận tiện cho khách tham quan. (Dam Sen is too big and I feel the map is not convenient for visitors)

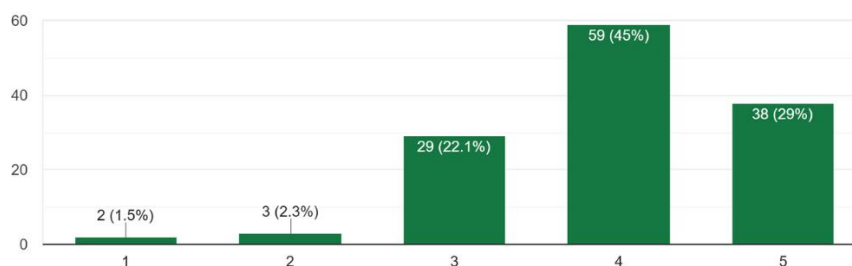

131 responses

2. Information on the operational status of games is not provided fully and promptly.

Thông tin về tình trạng hoạt động của các trò chơi chưa được cung cấp đầy đủ và kịp thời. (Information on the operational status of games is not provided fully and promptly)

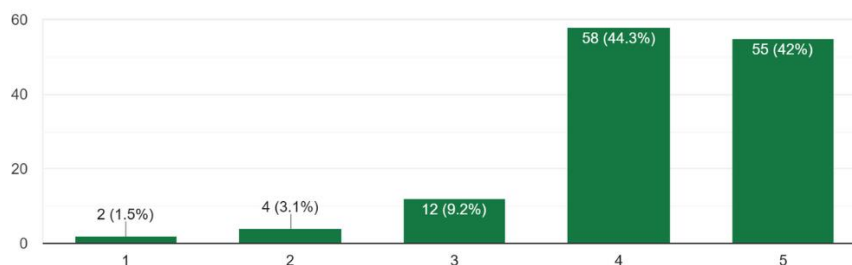

131 responses

3. I was not informed that the ride was under maintenance until I arrived at the location.

Tôi không được thông báo trước về việc trò chơi đang bảo trì cho đến khi đến khu vực đó. (I was not informed that the ride was under maintenance until I arrived at the location)

131 responses

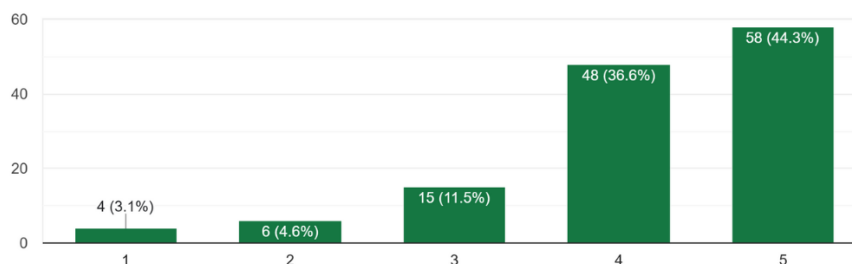

PART C - OTHER PROBLEMS (CONT.)

4. Paper tickets are easily torn or lost, which causes inconvenience for customers.

Vé giấy dễ bị rách hoặc thất lạc, gây bất tiện cho khách. (Paper tickets are easily torn or lost, which causes inconvenience for customers)

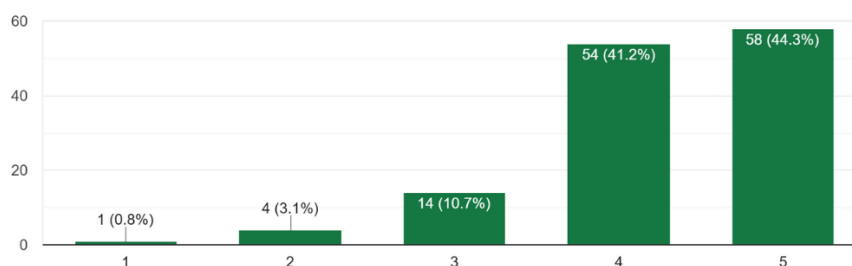

131 responses

5. The lack of an e-ticket option makes purchasing and using tickets less flexible.

Không có tùy chọn vé điện tử khiến việc mua và sử dụng vé kém linh hoạt hơn. (The lack of an e-ticket option makes purchasing and using tickets less flexible)

Appendix F: Customer Journey

CUSTOMER JOURNEY MAP

Appendix G: DVF Framework

Firstly, desirability refers to how strongly people are interested in the product and whether it satisfies their needs and wants. Secondly, viability examines whether the product has the potential to be profitable and maintain long-term financial stability. Thirdly, feasibility means whether the product can be made with the available technology and resources.

Staff incentive program is eliminated because this idea cannot be prototyped. Guest service booths are then eliminated because we believe that setting up these booths would require a significant capital investment. The main drawback of website or customer support through chat applications is the lack of flexibility and are hard to adapt, add and customize new features for Dam Sen, so they are excluded. Online kiosks are effective but costlier than a mobile app, so a new app is the top priority. Kiosks might be considered later in future.

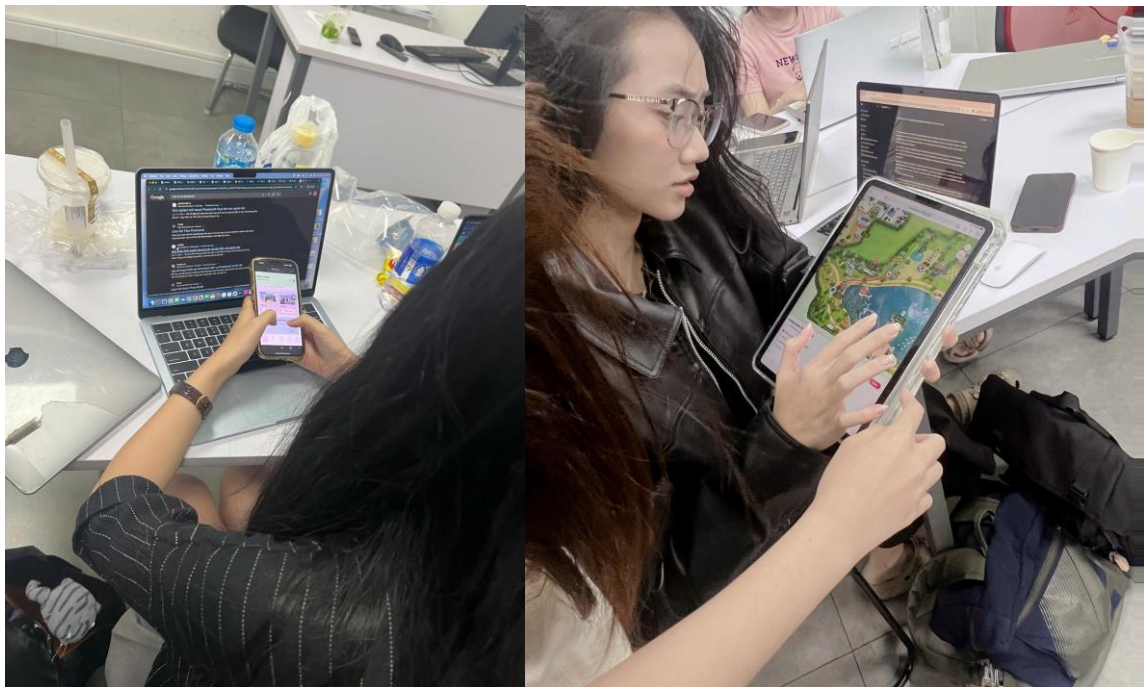

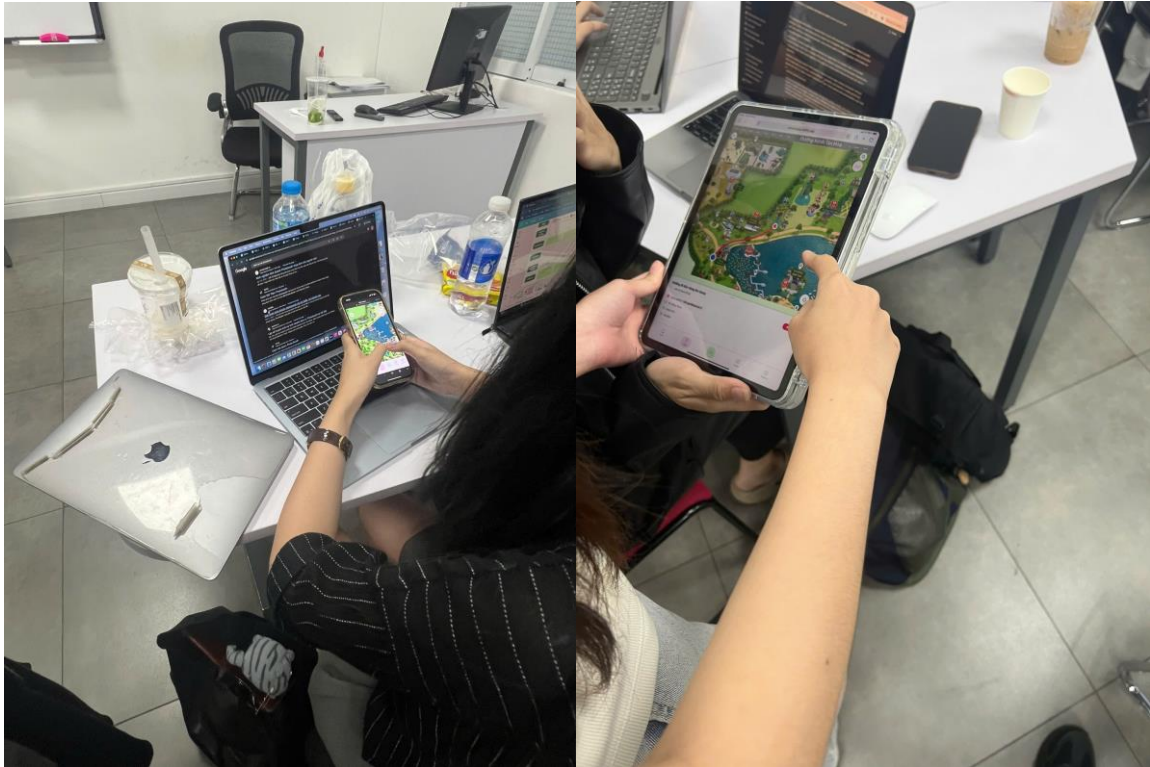

Appendix H: Instruction and Demo Video for High-fi Prototyped (In-Class Presentation)

Link for AI Instruction video: [SE 2 - App Demo Video for Presentation - Group 2](#)

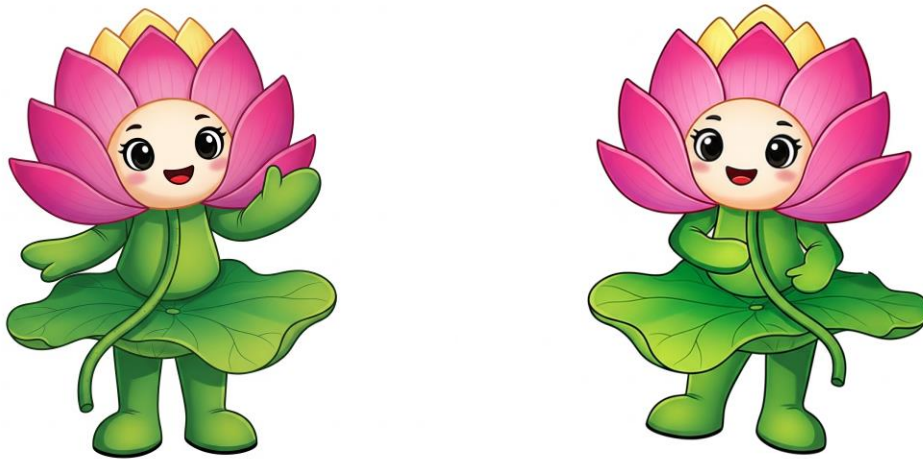

Link for In-Class Presentation Slides: [SE2 - Presentation Slides \(In-class\) - Group 2](#)

Appendix I: User Feedback Collection (Testing Images)

In Session 10, our group delivered a brief in-class presentation to gather feedback from both classmates and the lecturer, Dr. Phuong. We also presented a demo of the app, allowing everyone to try and test its features.

Appendix J: Bé Sen: New Mascot for the AI Chatbot

Appendix K: Final Model - 3 core features processes
